

# Lesson 01.A

## Introduction

DEVOPS - ITI 4  
HEI 2021-2022

# Your humble servant

---

- Denis Cauchois
  - Denis
  - Tu
- Team Manager at Worldline
  - BUILD & RUN
  - Retail Project

# What does DEVOPS mean ?

# Context 1/2

---

ENVIRONNEMENT

DEV

WORKERS

PRODUCTION

OPS

**CUSTOMERS**

# Context 2/2

---

## BUILD

- Analyze
- Specify
- Develop
- Setting up environments

## DEPLOY

- Deliver applications to environments

## RUN

- Protect production
- Get the necessary business metrics

# In IT project, we have

DEV

Wall of Confusion

OPS

*DevOps is a set of practices intended to reduce the time between committing a change to a system and the change being placed into normal production, while ensuring high quality.*

Len Bass, Ingo Weber, Liming Zhu  
DevOps  
A Software Architect's Perspective

# Quizz !!!

<https://forms.gle/nVaZaWmHty3xaFJH8>

# DevOps Core values

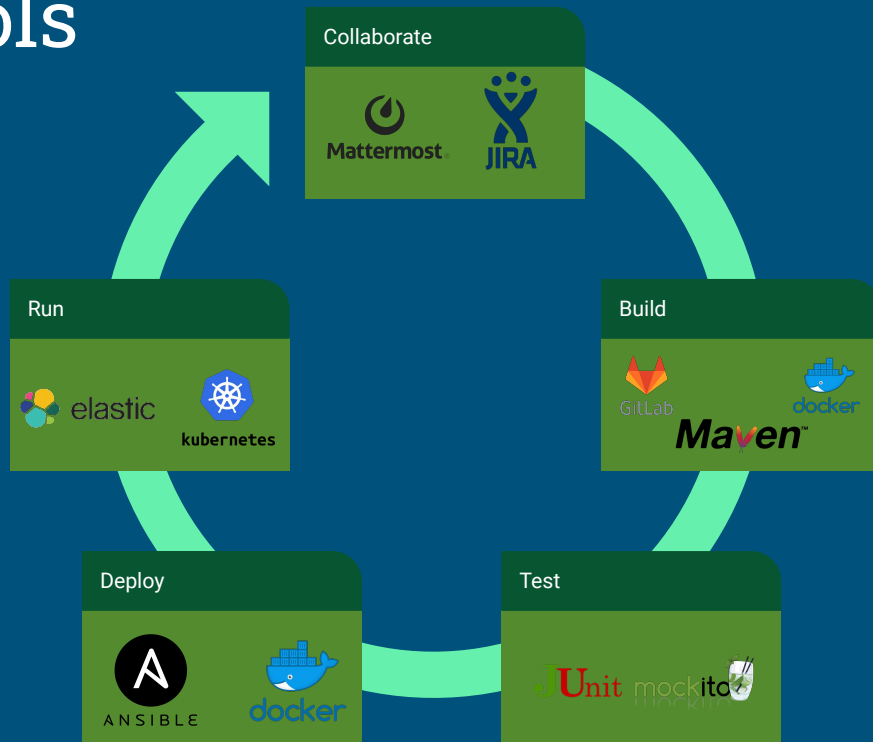

---

- Culture
  - Shared responsibility
- Automation
  - Continuous integration
  - Continuous deployment
- Lean
  - Continuous improvement
  - Visual Management
- Measurement
  - Metric storage
- Sharing
  - User-friendly communication channels
  - Source Configuration Management tools

# Devops tools

---

How are we  
going to work  
together ?

*Les performances individuelles, ce  
n'est pas le plus important. On  
gagne et on perd en équipe.*  
Zinedine Zidane

---

# Developer tools

---

- Lesson 01 :
  - Software Project Management with Maven
- Lesson 02 :
  - Version Control System with Git
- Lesson 03 :
  - Configuration Management with Java Properties
  - Log Management with Log4J
- Practical Work 01 :
  - Discovery of teamwork
- Practical Work 02 :
  - Log Management and Configuration Management

# Testing tools

---

- Lesson 04 :
  - Unit testing (1/2) with JUnit
- Lesson 05 :
  - Unit testing (2/2) with AssertJ and Mockito
- Practical Work 03 :
  - Discovery of unit tests
- Practical Work 04 :
  - Unit testing with file management
- Practical Work 05 :
  - Unit testing with Mock
- Practical Work 06 (Evaluated) :
  - All about unit tests

# Deployment tools & Automation tools

---

## Deployment tools

- Lesson 06 :
  - All that you want with Docker
- Practical Work 07
  - Run a container
- Practical Work 05
  - Build an image

## Automation tools

- Lesson 07 :
  - Continuous Integration with Gitlab-ci
- Practical Work 09 :
  - My first CI

# Game's rule

---

- During Lessons
  - Participate
  - Be quiet
- During Practical Work
  - Use courses
  - Check your source code
  - Think before asking a question

# Todo list

---

- [Register to gitlab.com](#) and post your login in :  
<https://forms.gle/NsWTJuVRB25yJDDU7>
- [Install git](#)
- [Register to docker.com](#)
